4'x8' pallets weigh 110 pounds and 4'x10' pallets weigh 120 pounds // Materials + pallet should not exceed 900 pounds							

For projects larger than 448 square feet, reference the discount schedule at the end of the price list
 For individual pieces that are greater than 50 square feet OR have a single length greater than 129 inches, add 20% to the square foot price
 Minimum price is 5 square feet. Pieces smaller than 5 square feet will be charged the price for 5 square feet
 If any panel has holes or notches it MUST be tempered (regardless of thickness)

"AC" refers to right hand column - additional cost to be added per piece of glass - look for bolded font
 Prices in red are tempered glass and for that product and gauge specification are only offered in tempered glass

For projects larger than 448 square feet, reference the discount schedule at the end of the price list
 For individual pieces that are greater than 50 square feet OR have a single length greater than 129 inches, add 20% to the square foot price
 Minimum price is 5 square feet. Pieces smaller than 5 square feet will be charged the price for 5 square feet
 If any panel has holes or notches it MUST be tempered (regardless of thickness)

"AC" refers to right hand column - additional cost to be added per piece of glass - look for bolded font
Prices in red are tempered glass and for that product and gauge specification are only offered in tempered glass

Shipping & Handling Information

Shipping quotes for all Parametre orders are to be quoted individually. FedEx Ground is the preferred method for most shipments given the convenient tube-style packaging. However, tubes longer than 10 feet must be shipped via Yellow or some other freight carrier.

Overnight/Air shipments CANNOT exceed 123" in total length. The package length is determined by the width of the partition. For example, a 4' wide x 8' long partition is packaged in a 4' tube. **Please reference below to determine the weight of your shipment.** For large shipments it may be more economical to ship in a crate or on a pallet than by individual tubes.

Also, as many as 3 tubes can be bundled together to minimize the piece count. For example and order of 6 partitions would be packaged as 2 bundles of 3 tubes.

Weight per linear foot (partition, hardware, and packaging)

2 lbs

Example: 4' wide partition weighs 8lbs for shipment.

If you incrementally discount any component of a sale, your commission on the discounted line item is impacted at a 50% pro rata share.

Example 1

If you give a 12% discount on an Expedite fee then your original commission of 10% would be decreased 6% (half of the 12% discount), resulting in a 4% commission.

Example 2

If you give a 8% discount on a 4 sheet Varia Ecoresin order, your original commission of 10% would be decreased 4% (half of the 8% discount), resulting in a 6% commission.

Highlighted portions are mandatory quantity breaks.
