Laser Level

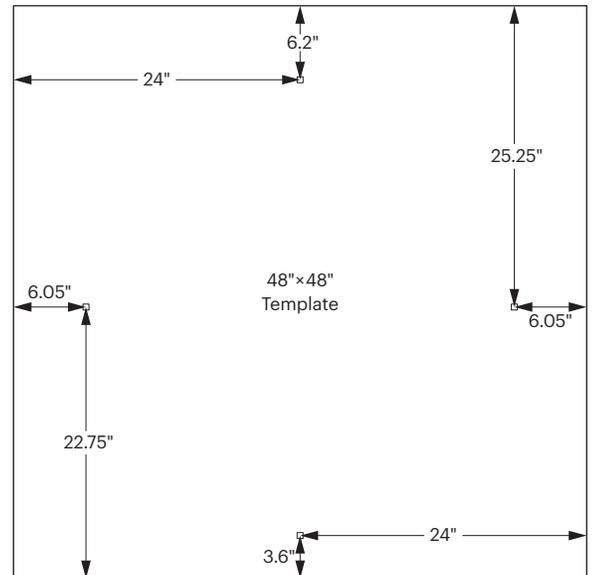

Cable Cutters

Glue

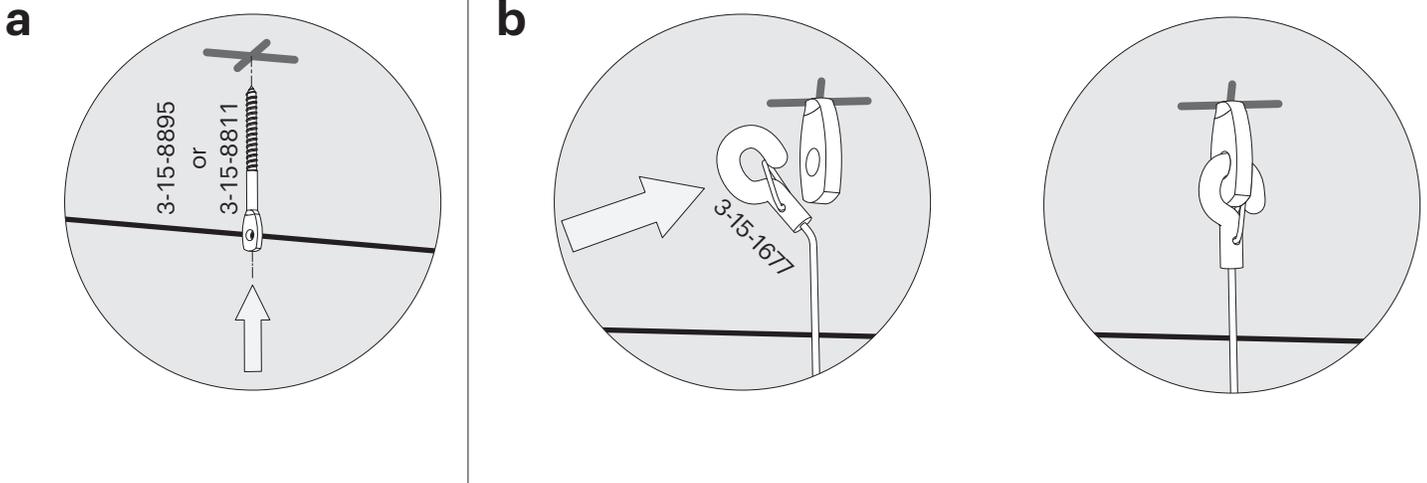

1 Position Clario Clouds and Mark Mounting Location

3form recommends creating a square template based on the outside dimension of the Clario Cloud, using something like a thin piece of wood or cardboard. Then using the dimensions provided here mark the pick points for your installation as needed. Multiple templates may be helpful with a larger installation of clouds. The pre-installed Clario Cloud Hooks can be used with a laser level to help determine the best anchoring locations for the site conditions.

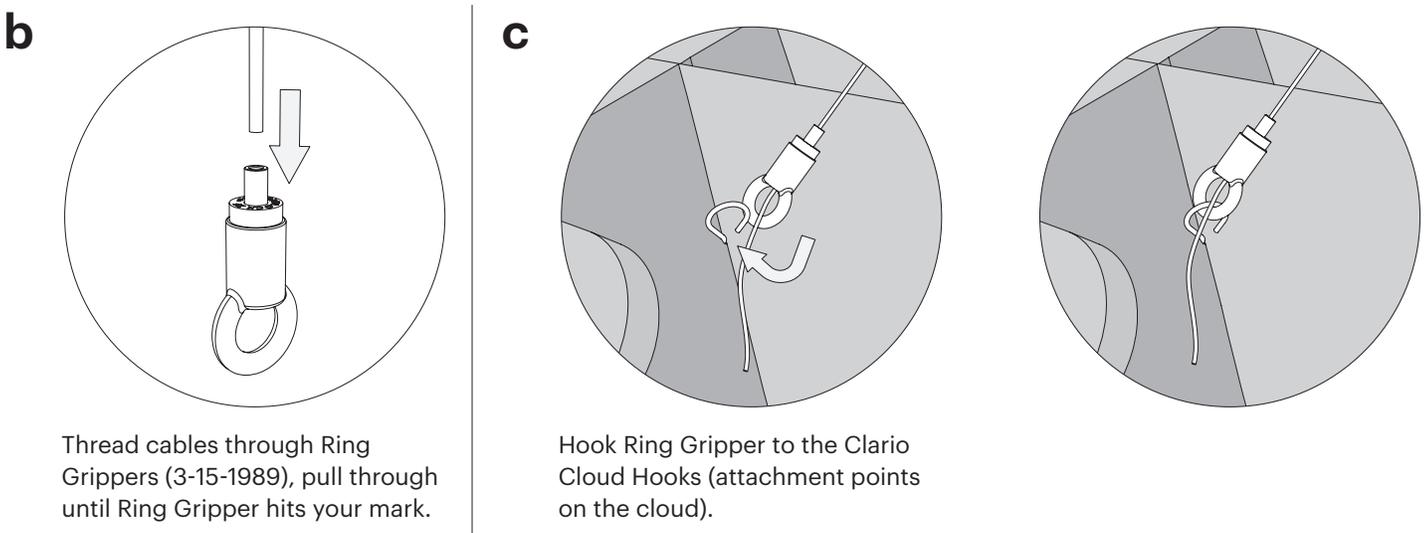

Installation: S Pattern

2 Install Cables and Eye Bolts (×4) into Mounting Surface

3 Attach Cable to Clario Cloud

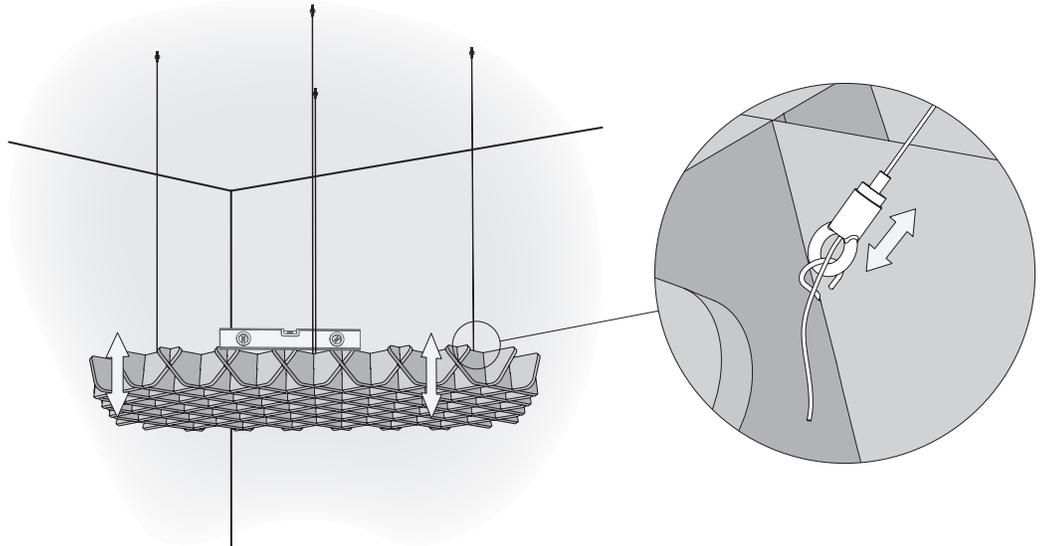

a Mark lengths of the cables (depending on the chosen height) using a permanent marker.

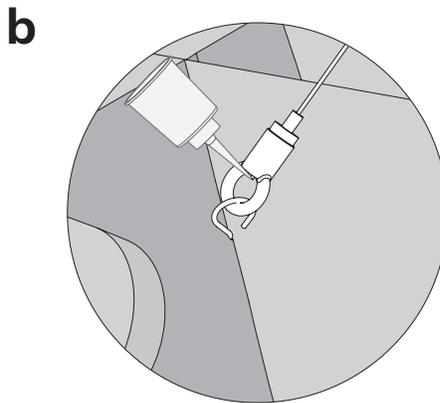

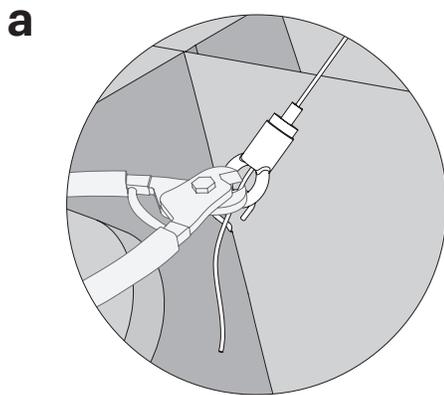

Installation: S Pattern

4 Level the Clario Cloud

Make sure cloud is level from all sides. Make micro adjustments at each ring gripper if needed.

5 Trim Cables and Glue Ends

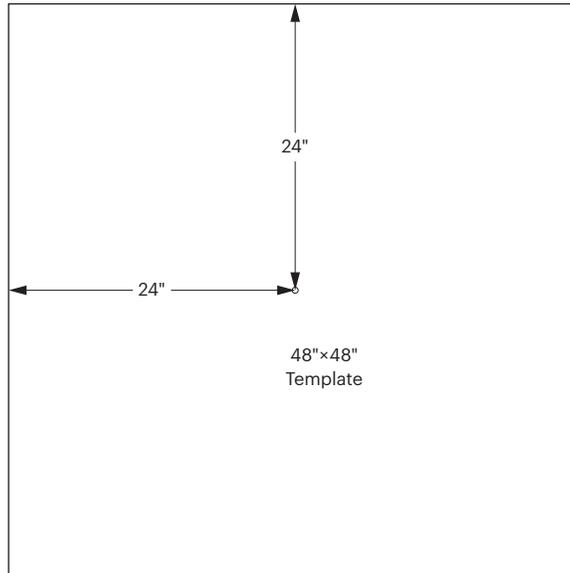

Installation: A,B,C,D,E,F,G,H,J,K,L,M,N,P,R Patterns

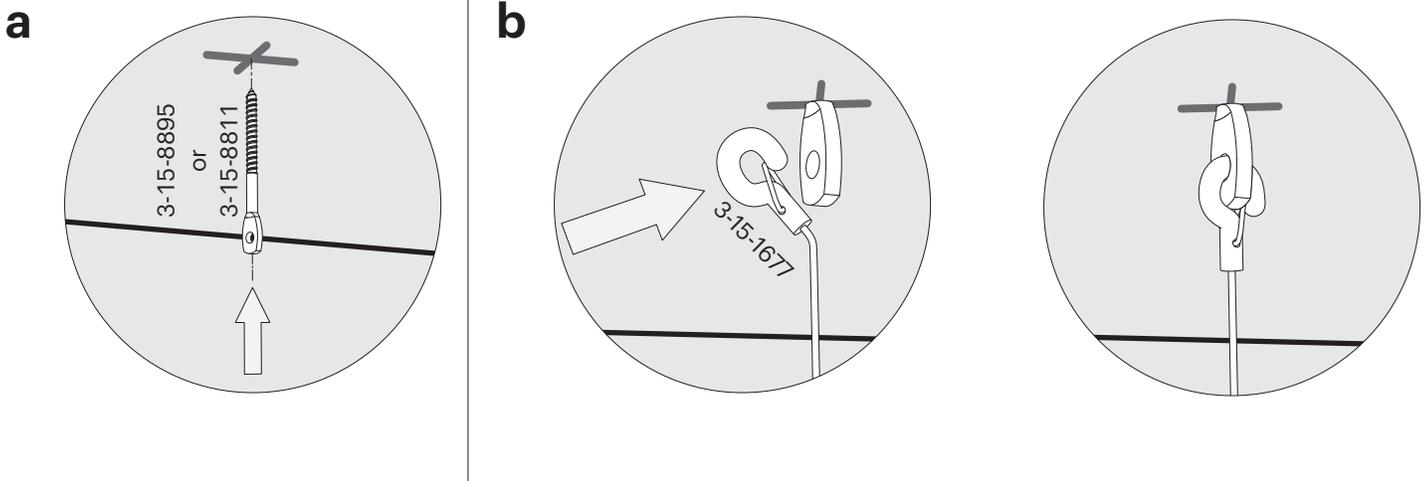

1 Position Clario Clouds and Mark Mounting Location

3form recommends creating a square template based on the outside dimension of the Clario Cloud, using something like a thin piece of wood or cardboard. Then using the dimensions provided here mark the pick points for your installation as needed. Multiple templates may be helpful with a larger installation of clouds. The pre-installed Clario Cloud Hooks can be used with a laser level to help determine the best anchoring locations for the site conditions.

**When connecting multiple modules, the connection to the ceiling is 48" on center. The center location on the packaging is for reference only.*

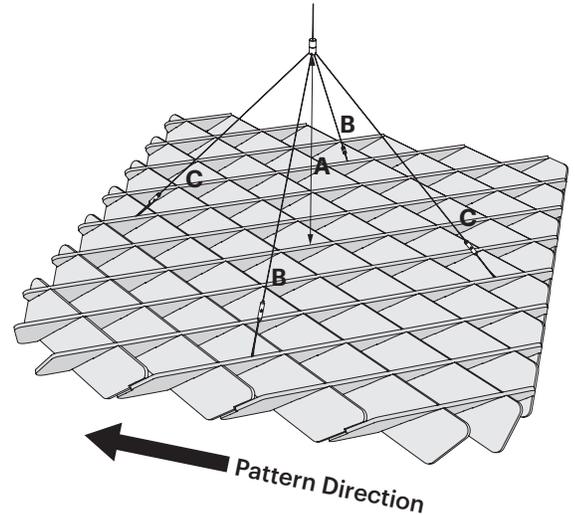

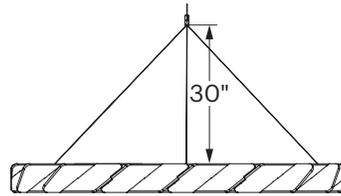

2 Install Cable and Eye Bolt into Mounting Surface

Installation: A,B,C,D,E,F,G,H,J,K,L,M,N,P,R Patterns

3 Assemble 4 Point Sputnik Hanging Anchor

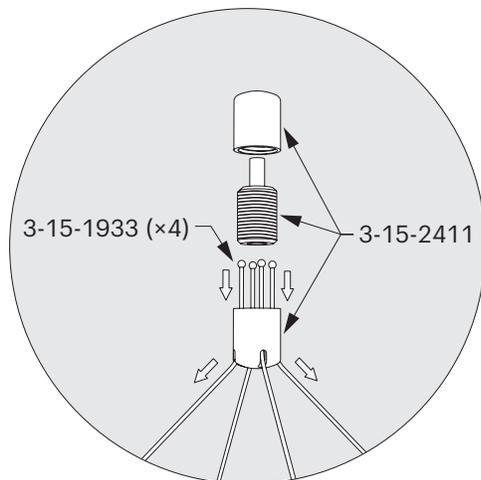

3form recommends installing Sputnik with 30" from top of Clario Cloud to bottom of Sputnik, minimum distance of 20". If using a distance below the recommended 30" height the installer should plan on more time for installation and leveling of the system.

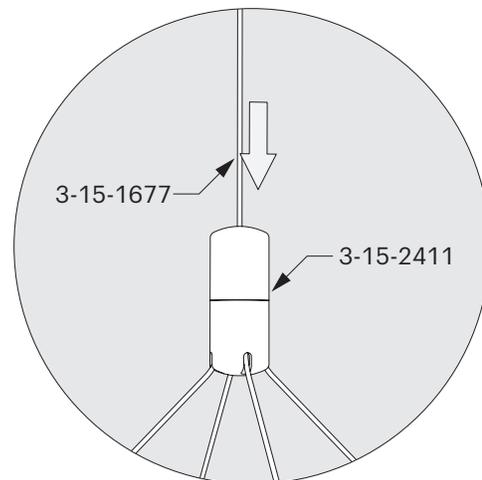

| Top of Clario Cloud to Bottom of Sputnik | Cable Length* Perpendicular to Pattern Direction | Cable Length* Parallel to Pattern Direction |
|--|--|---|
| A | B | C |
| 30" (recommended) | 35.4" | 36.3" |
| 20" (minimum) | 27.4" | 28.6" |

*Cable lengths are measured from the far end of the ring-side of the Ring Gripper (3-15-1989) to where the cable enters the Sputnik.

a Insert $\frac{3}{64}$ " cables (3-15-1933) into base and attach base.

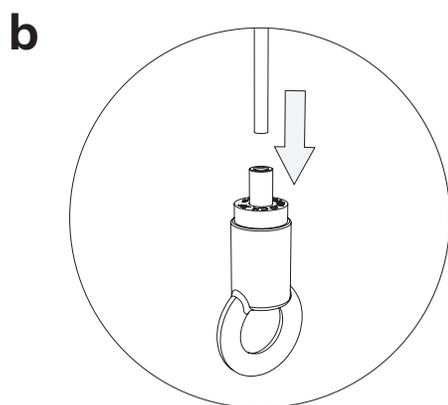

b Insert cable (3-15-1677) hanging from the ceiling.

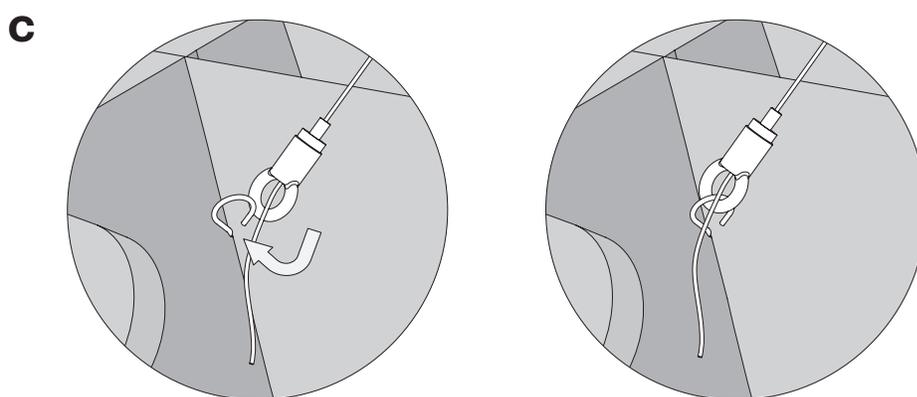

Installation: A,B,C,D,E,F,G,H,J,K,L,M,N,P,R Patterns

4 Attach Cable to Clario Cloud

- a** Mark lengths of the cables (depending on the chosen height) using a permanent marker.

Thread cables through Ring Grippers (3-15-1989), pull through until Ring Gripper hits your mark.

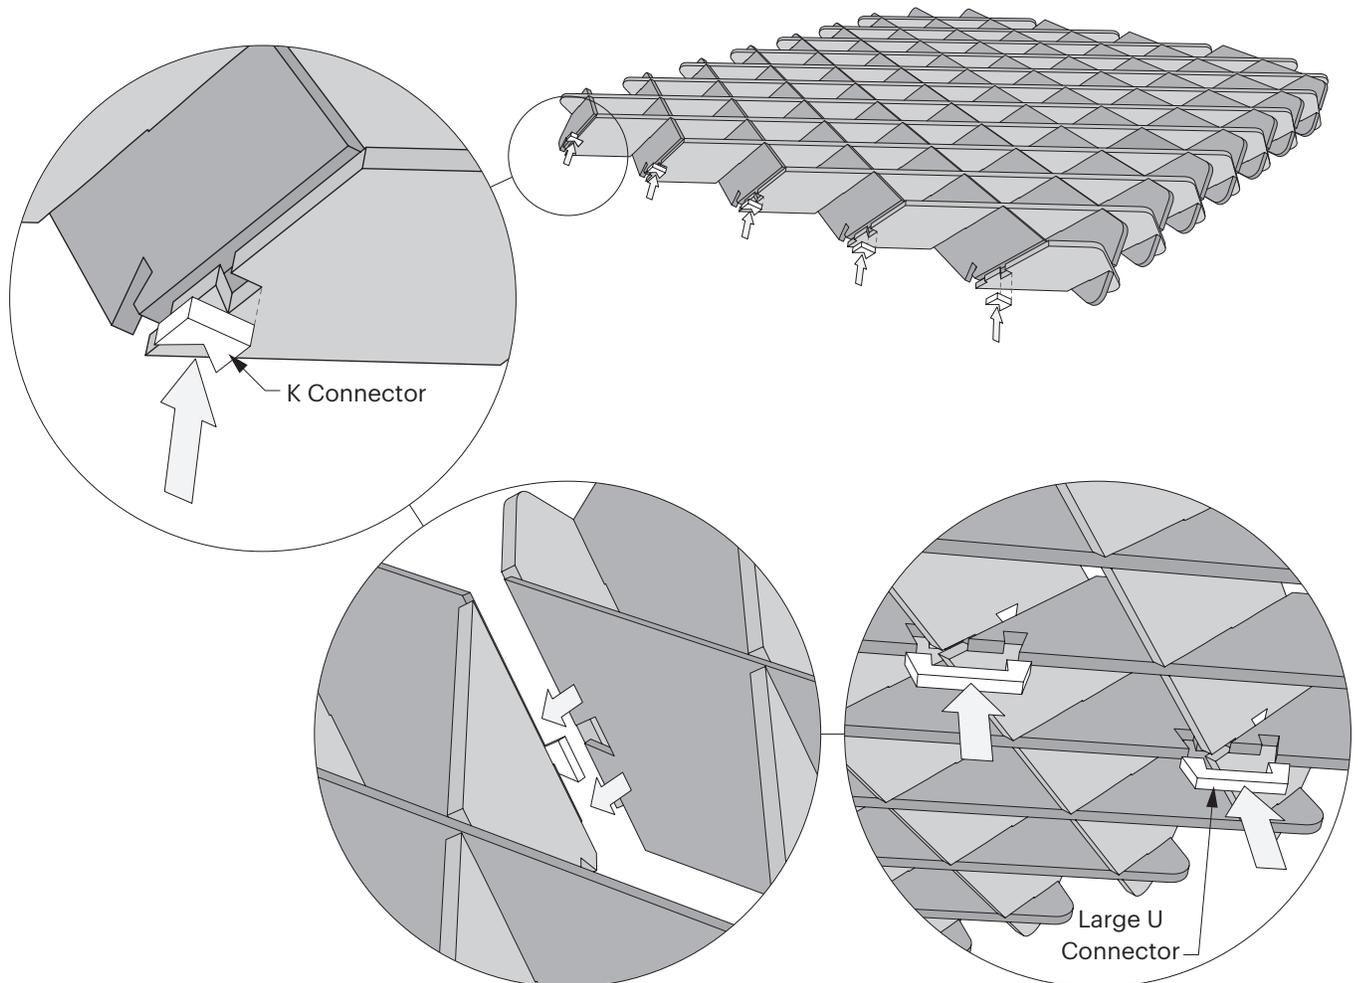

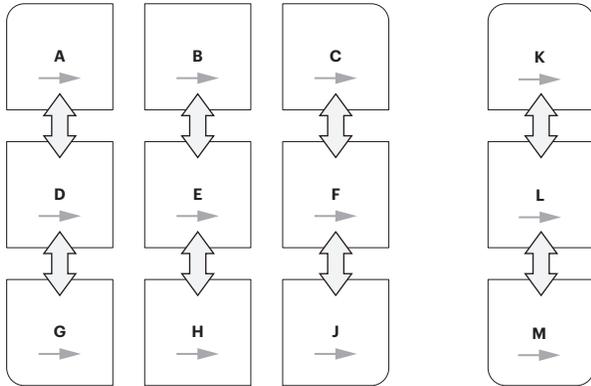

Hook Ring Gripper to the Clario Cloud Hooks (attachment points on the cloud).

Installation: A,B,C,D,E,F,G,H,J,K,L,M,N,P,R Patterns

5 Attach Additional Modules

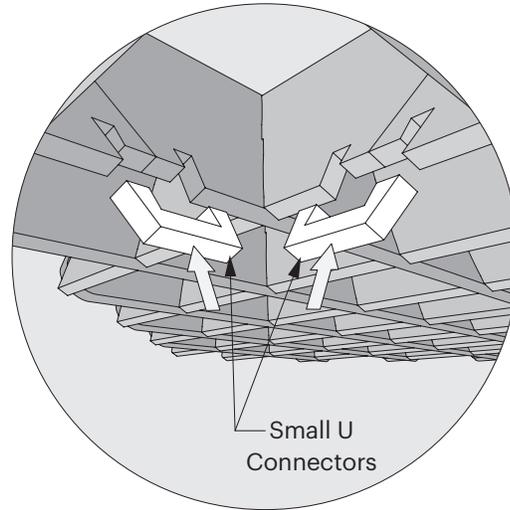

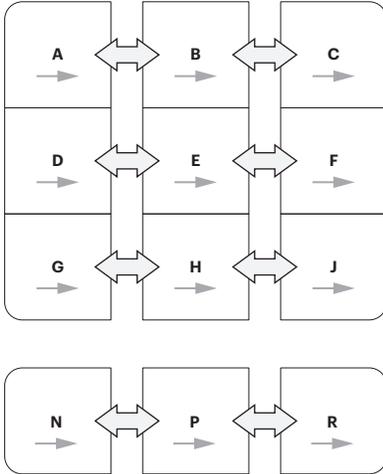

a K Connectors and Large U Connectors are used to connect modules at the locations indicated below.

Installation: A,B,C,D,E,F,G,H,J,K,L,M,N,P,R Patterns

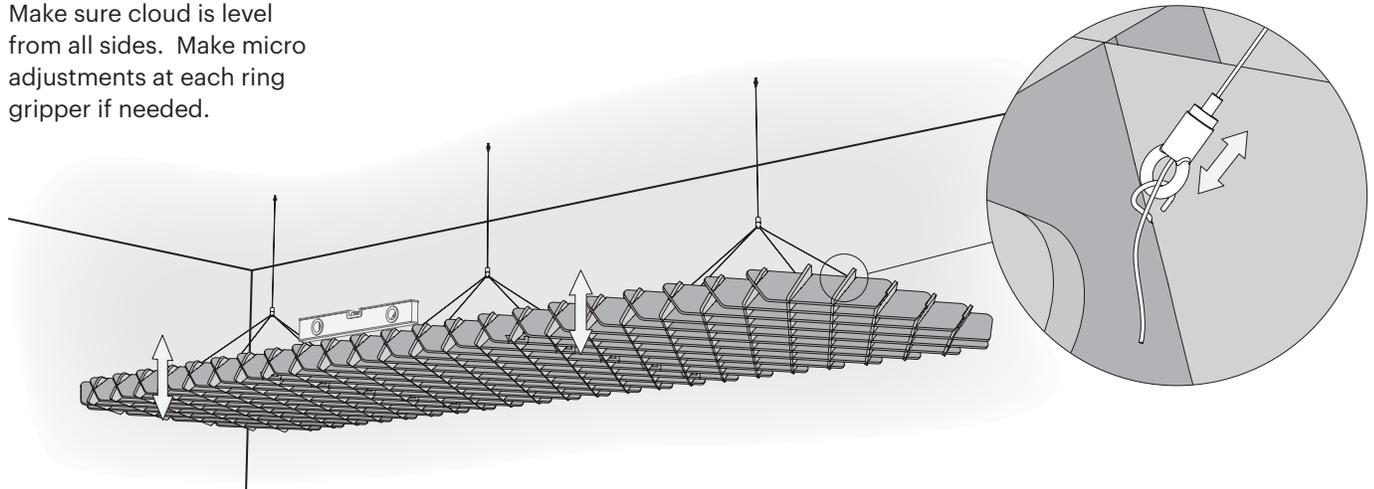

5 Attach Additional Modules *cont...*

b Small U Connectors are used to connect modules at the locations indicated below.

6 Level the Clario Cloud

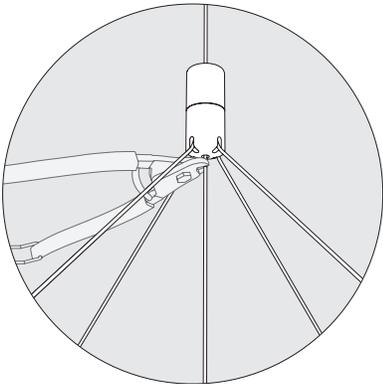

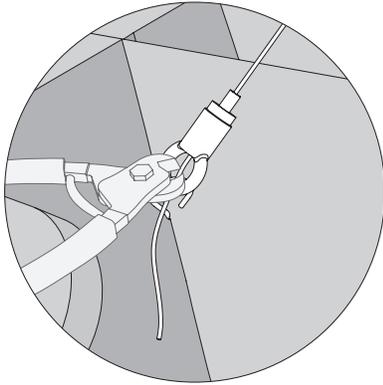

Make sure cloud is level from all sides. Make micro adjustments at each ring gripper if needed.

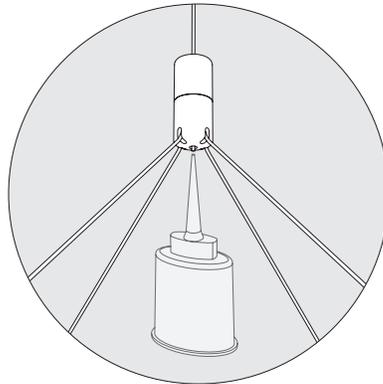

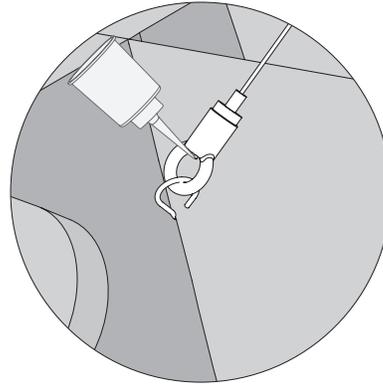

Installation: A,B,C,D,E,F,G,H,J,K,L,M,N,P,R Patterns
